1. **Задание:**

   Протестируйте поле с требованием ввода от 5 до 15 int символов.
   Проверки приоритезируйте.

2. **Задание:**

   Составьте список проверок для тестирования формы регистрации:

   ## Create Account

   Full Name (first and last names)

   [   ]

   Email address

   [   ]

   Password

   [   ]

   Confirm Password

   [   ]

   Create Account

3. **Задание:**

   Напишите тестовые сценарии для тестирования формы регистрации
   (см.задание 2).

1 задание

Протестируйте поле с требованием ввода от 5 до 15 int символов. Проверки приоритезируйте.

№	Test		Example
1	Happy path	Average value	1234567890
2	Boundary Values Check	Less than minimum value	1234
		Minimum value	12345
		Maximum value	123456789012345
		More than maximum value	1234567890123456
3	Empty value		
4	Other chars	Null	0
		Double	12.3456
		Negative number	-123456
		Not int values	qwейцу#!
5	Cases with spaces	Space	
		Space values at the begining	123456
		Space values at the end	123456
		Space in the middle	123 456

2 задание

Составьте список проверок для тестирования формы регистрации.

№	Check List	
1	Fill in all fields with correct values	
2	Create account with data that all ready exist in DB	
3	Do not fill in the fields	
4	Space in all fields	
5	Create an account with an empty field	1. Empty field "Full Name"
		2. Empty field "Email address"
		3. Empty field "Password"
		4. Empty field "Confirm Password"
9	Check field "Full Name"	1. Short name
		2. Long name
		3. With middle name
		4. Other localizations
		5. Spase before "Full Name"
		6. More than one spase between first and last name
		7. Spase after "Full Name"
		8. Type "Full Name" with CapsLock
		9. Type "Full Name" in small registor only
		10. Only first/last name
		11. First and last name without spase
		12. Enter special symbals
		13. Enter numbers
10	Check field "Email address"	1. Non-English language domain
		2. Type "Email Adress" with CapsLock
		3. Spase before "Email address"
		4. Spase after "Email address"
		5. Without '@' symbol
		6. Spase in local part
		7. Spase in domain part
		8. Email without dot in domain part
		9. Email without local part
		10. Email without domain part
		11. Incorrect domain
11	Check fields "Password" and "Confirm Password"	1. Hiding symbols
		2. Add spases
		3. Change value in "Password" after happy path
		4. At different values in "Password" and " Confirm Pasword"
		5. Short password

Напишите тестовые сценарии для тестирования формы регистрации

ID:0	Positive testing of the "Create Account" form		
	Preconditions:	Use data is apsent in DB	
	Steps:	1. Fill correct data in field "Full Name". Example Ivan Ivanov	Name show in "Full name"
		2. Fill user's email in "Email address". Example: ivan97@gmail.com	Email show in "Email address"
		3. Fill password in "Password" Example: password123	Password show in "Password". Password is blind
		4. Fill password in "Confirm Password". Use password in step 3	Password show in "Confirm Password". Password is blind
		5. Click "Create Account"	Usercab is opened. User email and password added in DB

ID:1	Registration using allready exist data		
	Preconditions:	Use data that allready exist in DB. Email: ivan97@gmail.com	
	Steps:	1. Fill correct data in field "Full Name". Example "Ivan Ivanov"	Name show in "Full name"
		2. Fill user's email in "Email address". Use email from precondition	Email show in "Email address". "That email address is taken. Try another" hint is shown
		3. Fill password in "Password" Example: "password123"	Password show in "Password". Password is blind
		4. Fill password in "Confirm Password". Use password in step 3	Password show in "Confirm Password". Password is blind
		5. Click "Create Account"	Registration failed

ID:2	Registation with all empty fields and spaces		
	Steps:	1. Do not add any data in all fields. Click "Create Account".	Registration failed
		2. Add spases in all fields. Click "Create Account"	Registration failed

ID:3	Registation with one empry fields		
	Preconditions:	Full Name: Ivan Ivanov Email address: ivan97@gmail.com Password: password123	
	Steps:	1. Fill all fields except "Full Name". Use data from preconditions. Click "Create Account"	"Fill in "Full Name" field" hint is shown. Registration failed
		2. Add data in "Full Name" from preconditions. Clear "Email address" fields. Click "Create Account"	"Fill in "Email address" field" hint is shown. Registration failed
		2. Add data in "Email address" from preconditions. Clear "Password" fields. Click "Create Account"	"Fill in "Password" field" hint is shown. Registration failed
		3. Add data in "Password" from preconditions. Clear "Confirm Password" fields. Click "Create Account"	"Fill in "Confirm Password" field" hint is shown. Registration failed

ID:4	"Full Name" field testing		
	Steps:	1. Short name. Example: Ly Si	Name show in "Full name"
		2. Long name. Example: Mahmudahmadinejad Wolfschlegelsteinhausenbergedorf	Name show in "Full name"
		3. With middle name. Example: Hommer Jey Simpson	Name show in "Full name"
		4. Other localizations. Example: Иван Иванов	Name show in "Full name"
		5. Spase before "Full Name" Example: Ivan Ivanov	Name automaticly changed to correct form. Name show in "Full name". Example: Ivan Ivanov
		6. More than one spase between first and last name. Example: Ivan Ivanov	Name automaticly changed to correct form. Name show in "Full name". Example: Ivan Ivanov

		7. Spase after "Full Name". Example: Ivan Ivanov	Name automaticly changed to correct form. Name show in "Full name". Example: Ivan Ivanov
		8. Type "Full Name" with CapsLock Example: IVAN IVANOV	Name automaticly changed to correct form. Name show in "Full name". Example: Ivan Ivanov
		9. Type "Full Name" in small registor only. Example: ivan ivanov	Name automaticly changed to correct form. Name show in "Full name". Example: Ivan Ivanov
		10. Only first/last name. Example: Ivan	"Add full name" hint is shown.
		11. First and last name without spase Example: IvanIvanov	"Add full name" hint is shown.
		12. Enter special symbals. Example: `~!@#$%^&*()_+-=|]}[{'";:,<.>/?	"Are you sure you entered your name correctly?" hint is shown
		13. Enter numbers. Example: 1234567890	"Are you sure you entered your name correctly?" hint is shown

ID:5	"Email address" field		
	Steps:	1. Use non-English language domain. Example: иван97@почта.рф	Email show in "Email address".
		2. Type "Email Adress" with CapsLock. Example: IVAN97@GMAIL.COM	Email automaticly changed to correct form. Email show in "Email address". Example: ivan97@gmail.com
		3. Spase before "Email address". Example: ivan97@gmail.com	Email automaticly changed to correct form. Email show in "Email address". Example: ivan97@gmail.com
		4. Spase after "Email address". Example: ivan97@gmail.com	Email automaticly changed to correct form. Email show in "Email address". Example: ivan97@gmail.com
		5. Without '@' symbol. Example: ivan09gmail.com	"Incorrect email. Try again" hint is shown
		6. Spase in local part. Example: ivan 97@gmail.com	"Incorrect email. Try again" hint is shown
		7. Spase in domain part. Example: ivan97@g mail.com	"Incorrect email. Try again" hint is shown
		8. Email without dot in domain part. Example: ivan97@gmailcom	"Incorrect email. Try again" hint is shown
		9. Email without local part. Example: @gmail.com	"Incorrect email. Try again" hint is shown
		10. Email without domain part. Example: ivan97@	"Incorrect email. Try again" hint is shown
		11. Incorrect domain. Example: ivan97@gmail.m	"Incorrect email. Try again" hint is shown

ID:6	"Password" and "Confirm Password" field		
	Steps:	1. Hiding symbols Example: password123	Password show in "Password" and "Confirm password" Password is blind.
		2. Add spaces before, insude and after password Example: pass word 123	Spaces are part of password. Password show in "Password" and "Confirm password" Password is blind.
		3. Change value in "Password" after happy path	"Those passwords didn't match. Try again" hint is shown
		4. Add different values in "Password" and " Confirm Password"	"Those passwords didn't match. Try again" hint is shown
		5. Short password Example: 1111	"Use 8 characters or more for your password" hint is shown
